What about all the LOST  
books of the Bible?

**Is yours complete?**

*Can you prove it?*

Most people now believe that the Bible is at best only partially true and at worst totally corrupted. This is a message brought to the masses by Muslims, Mormons, Jehovah's Witnesses, skeptical Scholars, and by hosts of professed Christians.

If the church does not have and believe in God's Word and know how to defend itself against these attacks, we have no foundation on which to base our faith.

Most Christians have absolutely no idea how our Scriptures were compiled and transmitted to us. This leaves them open to accepting claims that books don't belong, or are missing, or that translations have changed the Bible, or that perhaps more could be added to Scriptures. The Qur'an

(Koran) and the Book of Mormon merely profess to be continuations of the Bible; many are buying this lie. Adding to this confusion, the Roman

Catholic church professes that it created Scriptures by its own authority and acted on this by added books to their Bible which are not found in Protestant Bibles. So what's a Christian to accept and why?

Institutions of higher learning have all too often contributed to this doubt. Highlighting the myriad thousands of manuscripts and variances found, the claim that we can never know the truth is a typical followup. If this is true; what's a Christian to believe?

For those who still accept that the Bible is God's word, faithfully in our hands, another whisper is often heard; "but people can interpret the Bible to make it say anything they want." If this is true, then can we ever know what God really wants us to hear?

The issues are real and the need for this timely seminar is now. *Not Just Another Book* was designed by Christian researcher, pastor, and evangelist, Brent MacDonald.

Skeptics Welcome!
